

Hi,I am a xm radio subscriber. please reject NAB's petition 04-160. I listen to xm radio everyday, which I pay for. I don't see why the NAB has the right to sensor what I listen to. by not allowing me to listen to traffic and weather it is telling me that this is not a free country even for something that I pay for. please think about people who want to pay for something as unique as satellite radio, something which I pay a monthly fee and now NAB wants to sensor it. It just isnt right, please do not allow them to sensor my radio!
